1. User & Authentication

- User Login
- Role-based access (Admin, Office Staff, Driver, Collector)
- Company/Organization management
- User profile
- Password reset
- Session management

---

2. Customer Management

Manage all collection locations.

Customer Profile

- Business name
- Contact person
- Phone
- Email
- Address
- GPS location
- Operating hours
- Pickup instructions
- Notes
- Custom fields

Customer Settings

- Pickup frequency
- Bin size
- Material type
- Collection history
- Compliance status
- Attachments
- Contracts
- Photos

---

3. Point of Origin Management

Every pickup location becomes a traceable origin.

Features include:

- Create Point of Origin
- Edit
- Delete
- GPS coordinates
- Notes
- Attachments
- Custom fields
- Address validation
- Duplicate detection
- Distance sorting

---

4. Route Management

Dispatchers create optimized routes.

Features:

- Create routes
- Edit routes
- Delete routes
- Assign driver
- Assign vehicle
- Date scheduling
- Route optimization
- Add/remove stops
- Reorder stops
- Real-time updates
- Notify driver automatically

---

5. Mobile Collection App

Drivers collect data onsite.

For every collection:

- Customer selection
- Product selection
- Quantity
- Units
- Gross weight
- Tare weight
- Net weight
- Container count
- Pickup date/time
- GPS location
- Driver signature
- Customer signature
- Notes
- Photos
- Attachments

---

6. GPS Tracking

- Capture collector location
- Timestamp every pickup
- Route history
- Collection verification
- Audit trail
- Distance calculations

---

7. Offline Mode

A major feature.

- Works without internet
- Save locally
- Queue records
- Automatic sync
- Conflict resolution

---

8. Media Attachments

Attach:

- Photos
- Documents
- Receipts
- Certificates
- Notes

---

9. Compliance Management

One of Veriflux's strongest modules.

Includes:

- Audit-ready records
- Compliance reports
- Address normalization
- Duplicate detection
- Data anomaly detection
- Chain of custody
- Regulatory reporting
- Sustainability documentation

---

10. Customer Communication

Office users can:

- Update customer information
- View collection history
- Share notes
- Receive new collection records instantly

---

11. Office Dashboard

Web portal includes:

- Daily collections
- Route status
- Driver status
- Collection statistics
- Customer overview
- Compliance alerts
- Pending actions

---

12. Reporting

Likely reports include:

- Collection report
- Driver report
- Customer report
- Route efficiency
- Material collected
- Daily report
- Weekly report
- Monthly report
- Audit report
- Export to Excel/PDF

---

13. Notifications

- Route changed
- New assignment
- Collection completed
- Offline sync completed
- Compliance warnings

---

14. Search & Filters

Search by:

- Customer
- Address
- Route
- Driver
- Date
- Material
- Status

Filters:

- Completed
- Pending
- No Pickup
- Draft
- Synced

---

15. Collection Status

Statuses include:

- Draft
- Scheduled
- In Progress
- Completed
- No Pickup
- Cancelled
- Synced

---

16. Vehicle Management

Likely includes:

- Vehicle assignment

- Vehicle details
- Capacity
- Driver assignment

---

17. Product / Material Tracking

Track multiple material types.

Example:

- Used Cooking Oil
- Tallow
- Grease
- Feedstocks
- Raw materials

Each with:

- Quantity
- Unit
- Quality
- Category

---

18. Data Validation

Automatic:

- Address normalization
- Duplicate detection
- Invalid quantity detection
- Missing required fields
- GPS verification

---

19. Secure Data Sharing

Share with:

- Buyers
- Auditors
- Regulators

Options:

- Anonymize supplier names
- Hide addresses
- Share only required fields

---

20. Integrations

The mobile app syncs with the Veriflux web platform.

Potential integrations:

- REST API
- ERP
- Traceability platform
- Reporting tools

---

21. Audit Trail

Every action recorded:

- Created by
- Updated by
- Timestamp
- GPS
- Device
- Changes made

---

22. Analytics Dashboard

Charts such as:

- Collections/day
- Volume trends
- Route performance
- Customer frequency
- Material breakdown
- Driver productivity
